SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that Utah's 9,920 retail stores had sales totaling \$4.1 billion, an increase of 75.9 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 18.7 percent of the State's total sales by retailers compared to 18.7 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 18.0 percent, department stores with 10.9 percent, gasoline service stations with 8.9 percent, and eating places with 7.1 percent.

There were 1,912 inhabitants for each grocery store in the State in 1977, 716 inhabitants for each eating place, 5,321 inhabitants for each furniture store, 6,074 inhabitants for each jewelry store, and 24,544 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$417,960 per establishment compared to \$264,978 in 1972. In 1977, grocery stores averaged \$1,231,078 per establishment; department stores, \$9,257,571; eating places, \$175,557; furniture stores, \$510,544; and jewelry stores, \$156,000.

The per capita retail sales for grocery stores in the State were \$644; department stores, \$377; eating places, \$245; furniture stores, \$96; and jewelry stores, \$26.

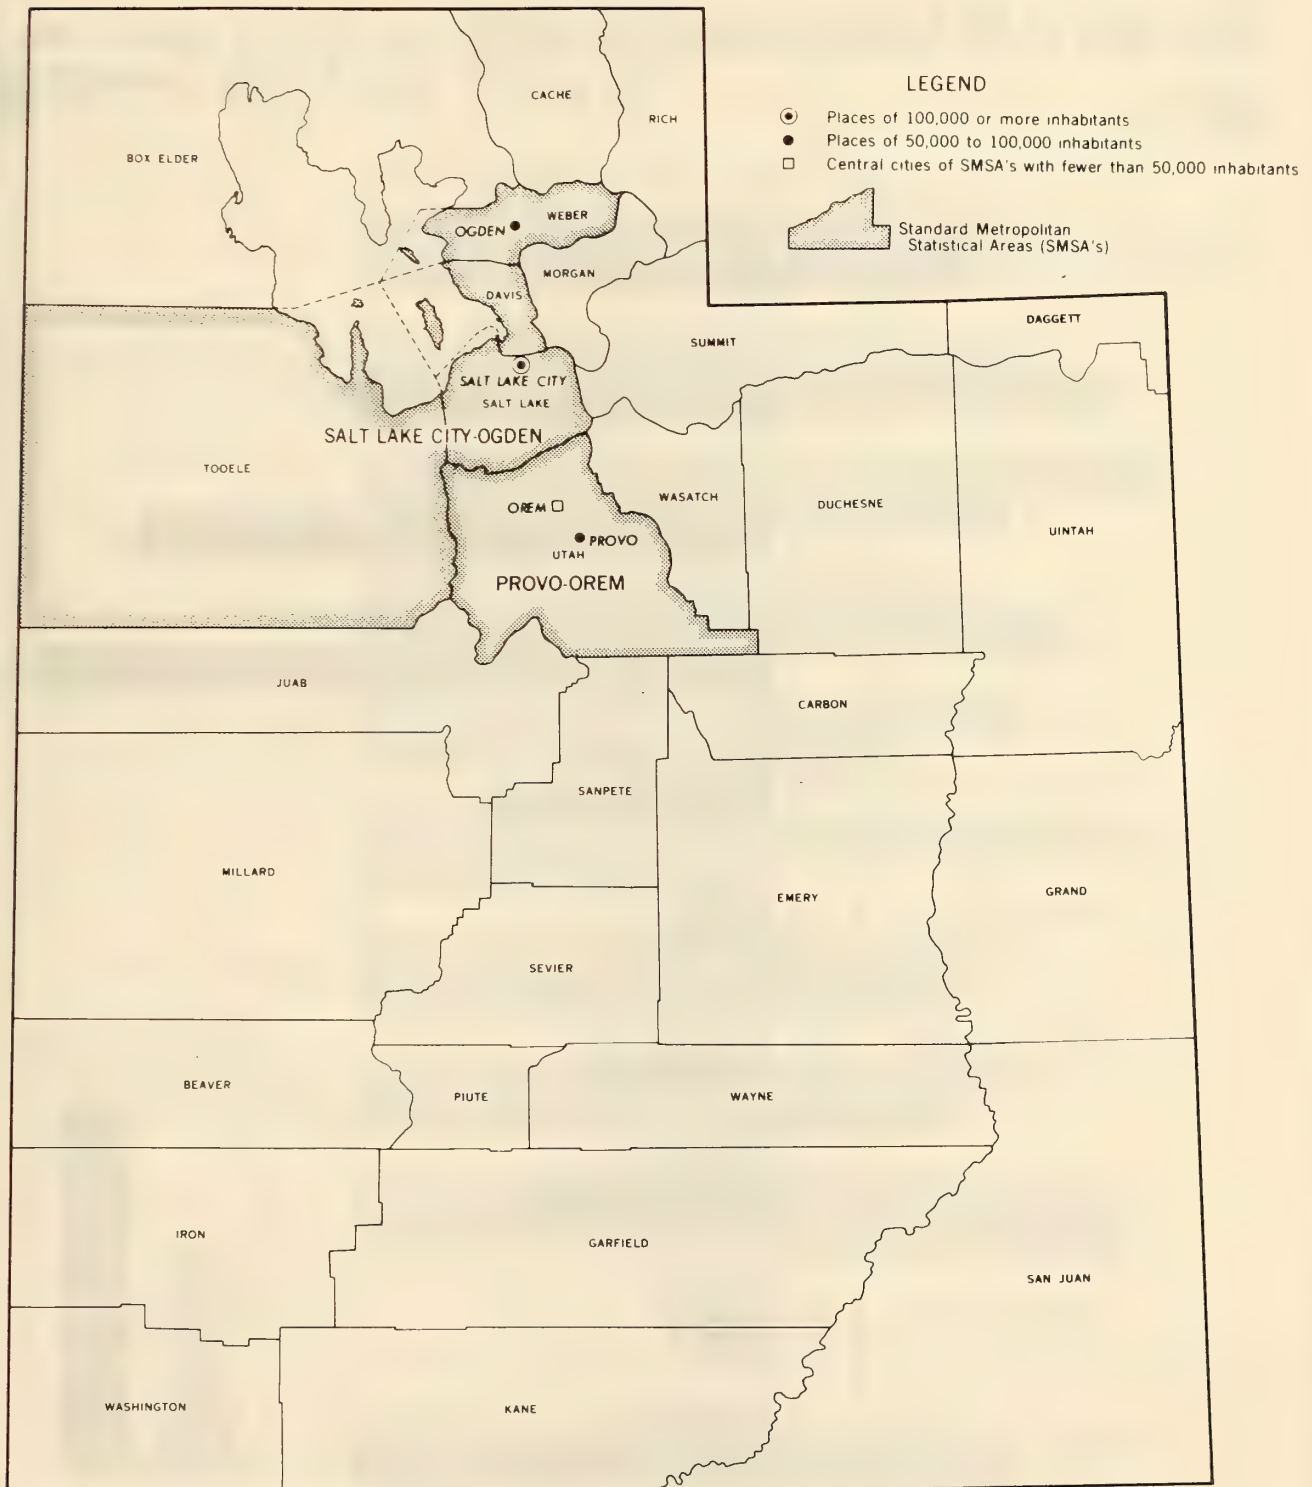

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$49,548. Eating places reported sales per employee of \$11,823 which contrasts sharply with the \$131,341 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$467 million, up 73.1 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 11.6 percent for all retailers, 6.6 percent for gasoline service stations, and 25.3 percent for eating places.

There were 81,430 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 24,427 employees, followed by grocery stores with 10,329 employees, and department stores with 9,031 employees.

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that Vermont's 5,736 retail stores had sales totaling \$1.7 billion, an increase of 51.5 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 22.5 percent of the State's total sales by retailers compared to 22.6 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 15.3 percent, department stores with 5.8 percent, gasoline service stations with 8.4 percent, and eating places with 7.0 percent.

There were 722 inhabitants for each grocery store in the State in 1977, 596 inhabitants for each eating place, 4,628 inhabitants for each furniture store, 6,841 inhabitants for each jewelry store, and 18,882 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$290,729 per establishment compared to \$220,773 in 1972. In 1977, grocery stores averaged \$574,207 per establishment; department stores, \$3,866,920; eating places, \$147,679; furniture stores, \$215,618; and jewelry stores, \$89,754.

The per capita retail sales for grocery stores in the State were \$794, \$205 in department stores, \$248 in eating places, \$47 in furniture stores, and \$13 in jewelry stores.

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$53,610. Eating places reported sales per employee of \$14,259 which contrasts sharply with the \$156,000 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$180.0 million, up 47.4 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 11.3 percent for all retailers, 6.9 percent for gasoline service stations, and 25.2 percent for eating places.

There were 29,812 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 8,058 employees, followed by grocery stores with 4,280 employees, and department stores with 1,897 employees.

Chittenden County led the counties in the State, accounting for 23.7 percent of total sales by retailers. Burlington had the largest sales among the cities in the State, accounting for 10.0 percent.

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that Washington's 31,872 retail stores had sales totaling \$13.5 billion, an increase of 80.9 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 20.4 percent of the State's total sales by retailers compared to 22.2 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 14.6 percent, department stores with 10.3 percent, gasoline service stations with 7.0 percent, and eating places with 8.8 percent.

There were 1,456 inhabitants for each grocery store in the State in 1977, 769 inhabitants for each eating place, 5,343 inhabitants for each furniture store, 5,931 inhabitants for each jewelry store, and 29,124 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$423,671 per establishment compared to \$260,069 in 1972. In 1977, grocery stores averaged \$1,129,462 per establishment; department stores, \$11,361,779; eating places, \$255,945 furniture stores, \$356,268 and jewelry stores, \$143,606.

The per capita retail sales for grocery stores in the State were \$775, \$390 in department stores, \$333 in eating places, \$67 in furniture stores, and \$24 in jewelry stores.

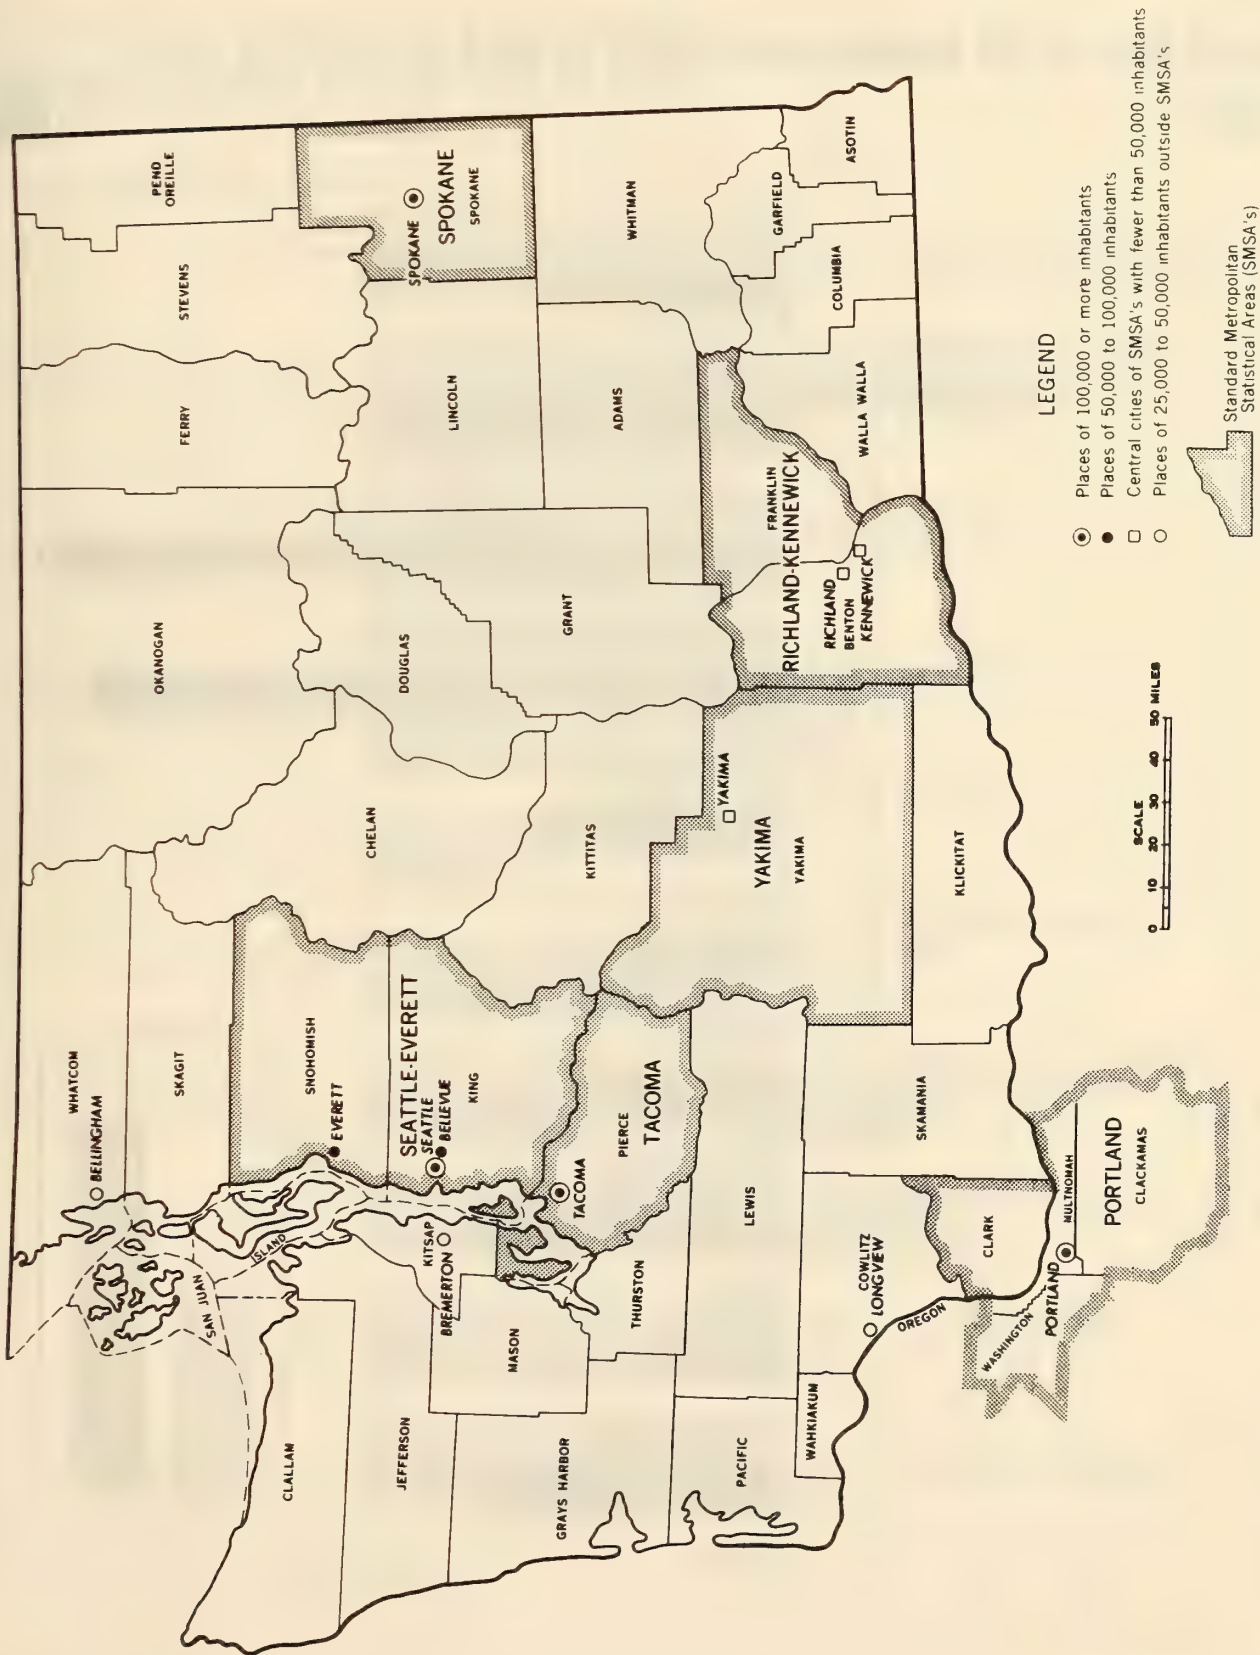

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$57,205. Eating places reported sales per employee of \$16,789 which contrasts sharply with the \$182,655 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$1.7 billion, up 75.6 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 12.8 percent for all retailers, 6.9 percent for gasoline service stations, and 26.9 percent for eating places.

There were 230,576 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 69,777 employees, followed by grocery stores with 26,443 employees, and department stores with 26,064 employees.

King County led the counties in the State, accounting for 36.4 percent of total sales by retailers. Seattle had the largest sales among the cities in the State, accounting for 16.7 percent.

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that West Virginia's 14,912 retail stores had sales totaling \$5.7 billion, an increase of 71.9 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 23.6 percent of the State's total sales by retailers compared to 23.3 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 19.0 percent, department stores with 10.6 percent, gasoline service stations with 8.7 percent, and eating places with 5.6 percent.

There were 775 inhabitants for each grocery store in the State in 1977, 887 inhabitants for each eating place, 4,637 inhabitants for each furniture store, 8,330 inhabitants for each jewelry store, and 17,301 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$380,645 per establishment compared to \$217,960 in 1972. In 1977, grocery stores averaged \$576,362 per establishment; department stores, \$5,785,490; eating places, \$156,890; furniture stores, \$344,619; and jewelry stores, \$191,000.

The per capita retail sales for grocery stores in the State were \$743, department stores, \$334; eating places, \$177; furniture stores, \$74; and jewelry stores, \$23.

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$60,855. Eating places reported sales per employee of \$16,660 which contrasts sharply with the \$135,682 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$602 million, up 69.9 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 11.0 percent for all retailers, 6.6 percent for gasoline service stations, and 24.6 percent for eating places.

There were 89,776 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 18,387 employees, followed by grocery stores with 13,898 employees, and department stores with 11,936 employees.

Kanawha County led the counties in the State, accounting for 17.1 percent of total sales by retailers. Charleston had the largest sales among the cities in the State, accounting for 8.9 percent.

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that Wisconsin's 42,819 retail stores had sales totaling \$14.9 billion, an increase of 61.3 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 19.3 percent of the State's total sales by retailers compared to 20.0 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 17.3 percent, department stores with 10.3 percent, gasoline service stations with 8.4 percent, and eating places with 7.4 percent.

There were 1,624 inhabitants for each grocery store in the State in 1977, 786 inhabitants for each eating place, 6,883 inhabitants for each furniture store, 7,578 inhabitants for each jewelry store, and 23,473 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$348,682 per establishment compared to \$215,293 in 1972. In 1977, grocery stores averaged \$1,023,982 per establishment; department stores, \$7,888,897; eating places, \$190,767; furniture stores, \$379,817; and jewelry stores, \$146,929.

The per capita retail sales for grocery stores in the State were \$630; department stores, \$336; eating places, \$242; furniture stores, \$55; and jewelry stores, \$19.

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$48,066. Eating places reported sales per employee of \$13,223 which contrasts sharply with the \$131,852 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$1.8 billion, up 59.1 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 12.4 percent for all retailers, 6.9 percent for gasoline service stations, and 26.1 percent for eating places.

There were 300,152 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 82,487 employees, followed by department stores with 36,619 employees, and grocery stores with 35,426 employees.

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that Wyoming's 4,692 retail stores had sales totaling \$1.7 billion, an increase of 103.4 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 18.6 percent of the State's total sales by retailers compared to 18.6 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 16.8 percent, department stores with 3.9 percent, gasoline service stations with 13.0 percent, and eating places with 6.9 percent.

There were 1,622 inhabitants for each grocery store in the State in 1977, 608 inhabitants for each eating place, 4,887 inhabitants for each furniture store, 3,653 inhabitants for each jewelry store, and 28,946 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$352,518 per establishment compared to \$193,135 in 1972. In 1977, grocery stores averaged \$1,325,116 per establishment; department stores, \$4,900,231; eating places, \$184,411; furniture stores, \$345,987; and jewelry stores, \$91,680.

The per capita retail sales for grocery stores in the State were \$817; department stores, \$169; eating places, \$303; furniture stores, \$71; and jewelry stores, \$25.

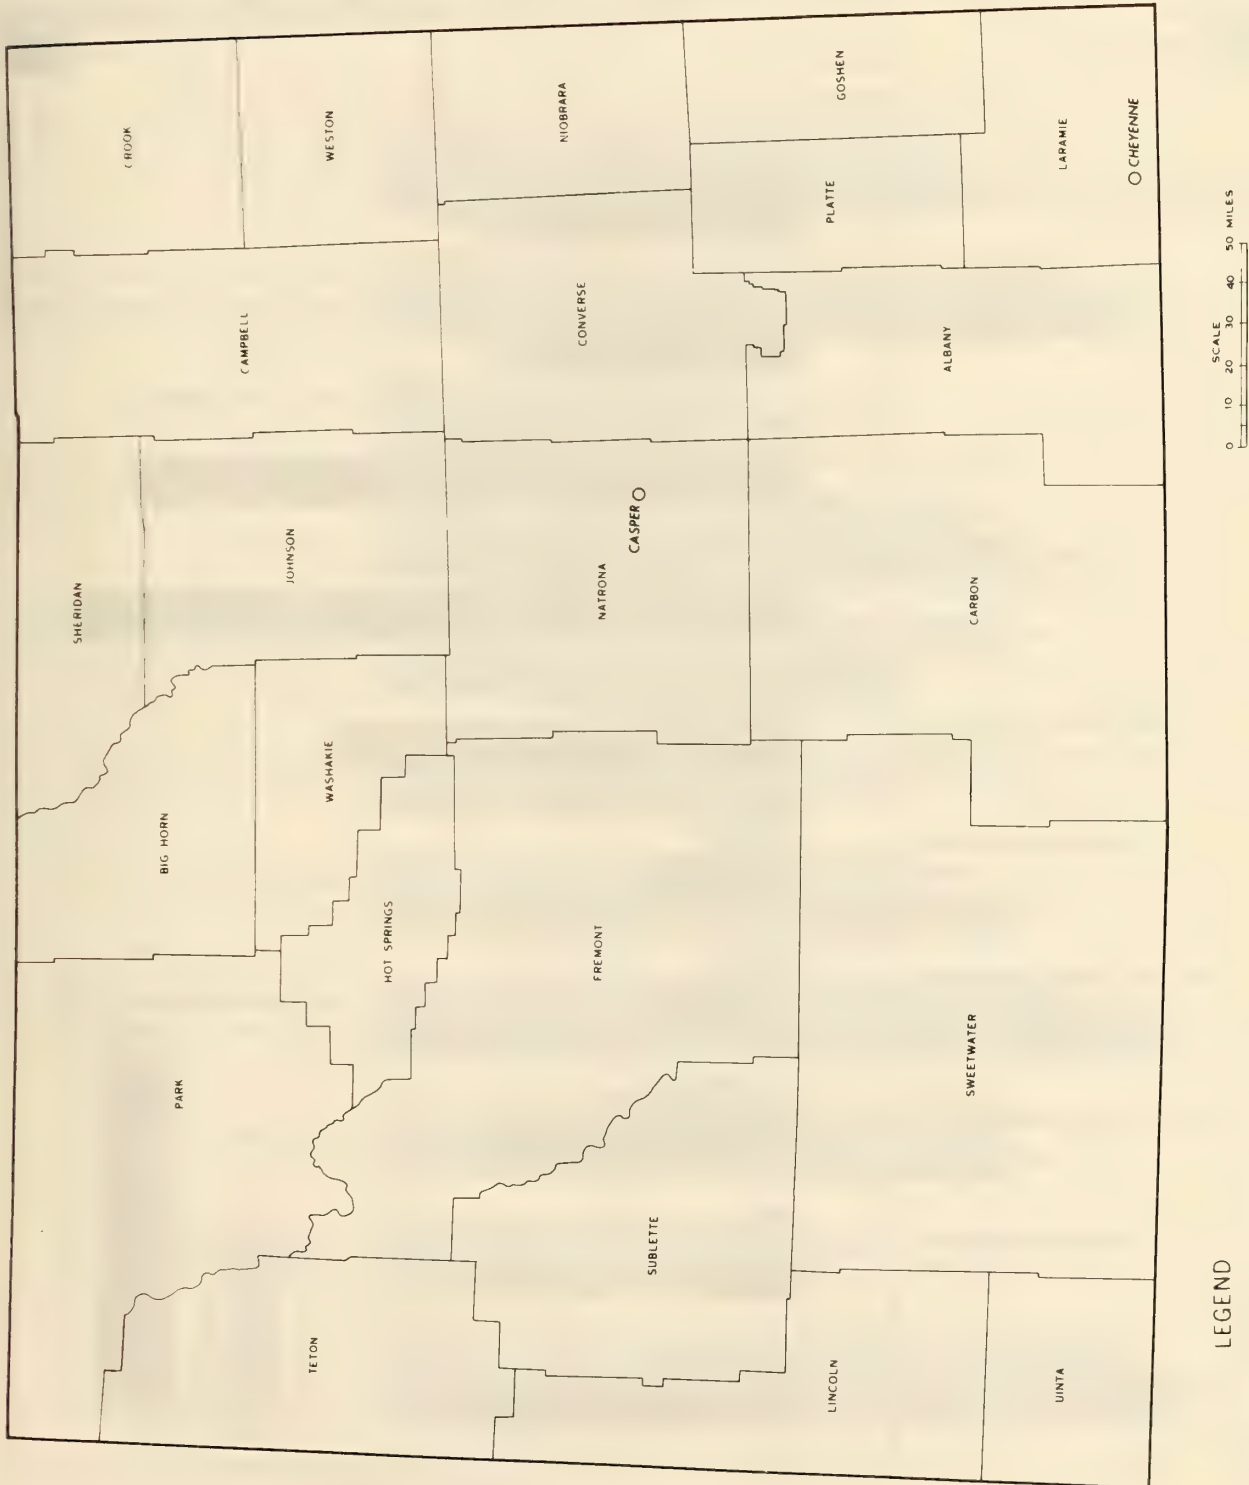

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$57,997. Eating places reported sales per employee of \$15,079 which contrasts sharply with the \$175,019 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$180 million, up 101.6 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 11.3 percent for all retailers, 7.5 percent for gasoline service stations, and 25.2 percent for eating places.

There were 27,568 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 7,442 employees, followed by gasoline service stations with 2,640 employees, and new car dealers with 2,076 employees.

Natrona County led the counties in the State, accounting for 19.3 percent of total sales by retailers. Casper had the largest sales among the cities in the State, accounting for 17.8 percent.

APPENDIX A. General Explanation

CENSUS COVERAGE AND METHODOLOGY

Structure and method of enumeration—Firms in the 1977 Census of Retail Trade were divided into the nonmail universe and mail universe. The coverage and the method of obtaining census information from each follow:

1. The nonmail universe consists of firms which were not required to file a regular census return and includes:

- a. All nonemployers, i.e., all firms with no paid employees during 1977. Sales information for them was obtained from 1977 Federal income tax records. Although consisting of many firms, nonemployers account for less than 5 percent of total retail sales.

The census included only those retail nonemployer firms which reported a sales volume of \$2,500 or more during 1977 plus firms in operation for less than the full year that reported sales which, if projected to an annual basis, would have reached a total of \$2,500 or more. This treatment is the same as in the 1972 census.

- b. Selected small employers, i.e., all business firms with paid employees as shown in the active records of the Internal Revenue Service (IRS) which were subject to payment of Federal Insurance Contribution Act (FICA) taxes. "Small employers" are all those single-establishment firms with payroll below a specified cutoff. Although the cutoff varied by kind of business, small employers generally included firms with one to three employees and represented about 10 percent of total retail sales.

Data on sales, payroll, and employment for employer firms below the cutoff were obtained from the records of the IRS and the Social Security Administration (SSA), except for a 10-percent sample which was included in the mail universe.

2. The mail universe consists of firms for which information was obtained basically by means of a mail canvass and includes:

- a. Large employers, i.e., all employer firms above the payroll size cutoff established to separate large from small employers. Within this category, a report of company organization is conducted periodically to identify firms which operated establishments at more than one location and to obtain information on payroll and mid-March employment at each location. The 1976 Report of Company Organization was used as a coverage check in the census. In the census mailing package, firms were sent a form to use in updating the list of establishments with those opened since 1976.
- b. The 10-percent sample of small employers referred to in section 1b above.

Method of classifying kinds of business—The retail trade classifications for all establishments were based on the Standard Industrial Classification (SIC) Manual.¹ However, the method of assigning these classifications, and the level of detail at which establishments were classified, differed between the nonmail and mail universes as follows:

1. The nonmail universe.

- a. All nonemployers were classified on the basis of information supplied on the Federal income tax returns. They were coded in less detail than employer firms; therefore, the combined data for all establishments (nonemployer firms plus establishments of employer firms) are presented in less kind-of-business detail than are the data for employer establishments alone.

- b. Selected small employers were classified on the basis of the most current census kind-of-business classification available from one of the Bureau's current sample surveys or the 1972 census. Otherwise, the SSA classification was used or the IRS classification based on the firm's description of its principal business activity as entered on its IRS business tax return.

If the Census, SSA, and IRS classifications proved inadequate (none corresponded to a 1977 census classification in the detail required for employers), the firm was sent a brief inquiry requesting information necessary to assign a 1977 census kind-of-business code.

2. The mail universe was classified on the basis of answers to questions on sales by merchandise lines and other special inquiries.

COMPARABILITY OF 1972 AND 1977 CENSUSES

The 1972 and 1977 Censuses of Retail Trade were conducted under similar conditions and procedures. However, strict comparability of the data for the two censuses is limited by the following factors:

Geographic areas—The boundaries of a number of areas for which data are shown in the 1977 census are not the same as in the 1972 census because of annexations, other boundary changes, and redefinitions of SMSA's since 1972. In addition, not all areas which qualified for presentation of separate data in one of the census years qualified or existed in both census years (see Geographic Areas Covered in the Introduction).

Classifications

1. In 1977, IRS assigned a more detailed classification code to the business tax returns than they did in 1972. As a result, data are shown for all establishments for certain kinds of business that could not be shown in 1972. The kinds of business involved are:

- Lumber and other building materials dealers
- Paint, glass, and wallpaper stores
- Dairy products stores
- Miscellaneous food stores
- Boat dealers
- Recreational and utility trailer dealers
- Motorcycle dealers
- Automotive dealers, n.e.c.
- Children's and infants' wear stores
- Miscellaneous apparel and accessory stores
- Floor covering stores
- Drapery, curtain, and upholstery stores
- Miscellaneous home furnishings stores
- Radio and television stores
- Music stores
- Fuel oil dealers
- Liquefied petroleum gas (bottled gas) dealers
- Fuel and ice dealers, n.e.c.
- News dealers and newsstands
- Miscellaneous retail stores

2. The definition of specialty sporting goods stores in the 1972 census differs from that in the 1977 census. In 1972, specialty sporting goods stores were defined as establishments specializing in a particular line of sporting goods; in 1977, the definition was changed to an establishment specializing in a maximum of four lines of sporting goods. As a result, data for both specialty sporting goods stores and general sporting goods stores are not comparable between the two censuses.
3. In 1977, the calculation to determine the proper kind-of-business classification based on the dominant merchandise line (or the dominant homogeneous group of merchandise lines) was done after excluding all nonmerchandise sales from total sales; in 1972, the calculation was done using total sales, including nonmerchandise sales. As a result, some establishments were assigned a different kind-of-business classification in 1977 than they would have been assigned in 1972. The change was insignificant in most kinds of business but did result in a number of "Other auto and home supply stores" being reclassified as "Tire, battery, and accessory dealers" if a large part of their receipts came from a service department.

Sales—The 1972 sales statistics included two items omitted from the 1977 sales statistics:

1. Sales (or other) taxes collected from customers and forwarded to taxing authorities.
2. Carrying charges or other charges for credit.

Studies have shown that these items were substantially underreported in the 1972 census. Sales taxes and credit charges reported in the 1972 census have been estimated at about \$10 billion for the United States as a whole.

Legal form of organization—In the 1972 census, the legal form of organization was based on data reported directly in the censuses only for establishments of large multiestablishment companies—those with a total company employment of 250 persons or more. (These large firms included information on legal form of organization in their company summary reports.) The legal form of organization of all other establishments was generally decided by the type of IRS business income tax return form they filed; e.g., businesses filing a partnership Federal tax return (form 1065) were assumed to be partnerships.

In 1977, the legal form of organization was determined for establishments in the mail universe on the basis of the response to the legal form of organization inquiry on the census forms. The legal form of organization of nonmail establishments was generally decided by the type of IRS business income tax return form filed.

The retail trade report, "Establishment and Firm Size," presents data by the following legal forms of organization:

1. Individual proprietorships.
2. Partnerships.
3. Corporations (including non-tax-exempt cooperatives).
4. Other legal forms.

EXPLANATION OF TERMS

Establishments—An establishment is a single physical location at which business is conducted. It is not necessarily identical with a company or enterprise, which may consist of one or more establishments. Census of retail trade figures represent a summary of reports for individual establishments rather than companies. For cases where a census report was received, separate information was obtained for each location where business was conducted. When administrative records were used instead of a census report, no information was available on the number of locations operated. Estimates of this number were derived from a sample and are provided in the Miscellaneous Subjects report. Each census report was tabulated in accordance with the physical location at which the business was conducted. The count of establishments in this publication represents the number in business at the end of the year.

When two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and when conditions prescribed by the SIC manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were obtained in the census.

In the case of leased departments (separately owned businesses operated as departments or concessions of retail business under another ownership, such as a separately owned shoe department in a department store), only a single establishment combining leased departments with the main retail establishment in which they are located is recognized for census purposes. However, when information is obtained from IRS and SSA sources rather than a census report, it is generally not possible to differentiate between leased departments and separate establishments. Leased retail departments located in other than retail establishments (e.g., a gift shop located in a hotel) are considered separate retail establishments.

Sales—Sales include merchandise sold for cash or credit at retail and wholesale by establishments primarily engaged in retail trade; amounts received from customers for layaway purchases; receipts from rental or leasing of vehicles, equipment, instruments, tools, etc.; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; and gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed on to the retailer.

Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from total sales. Total sales do not include carrying or other credit charges; sales (or other) taxes collected from customers and forwarded to taxing authorities; commissions from vending machine operators; and nonoperating income from such sources as investments, rental or sale of real estate, etc.

Sales in this report do not include retail sales made by manufacturers, wholesalers, service establishments, or other businesses whose primary activity is other than retail trade. They do include receipts other than from the sale of merchandise at retail (e.g., service receipts, sales to industrial users, and sales to other retailers) by establishments primarily engaged in retail trade.

Although the count of establishments in this report represents the number in business at the end of the year, the sales figures include sales of all establishments in business at any time during the year.

Payroll entire year—Payroll includes all forms of compensation, such as salaries, wages, commissions, bonuses, vacation allowances, sick leave pay, and the value of payments in kind (e.g., free meals and lodgings), paid during the year to all employees. Tips and gratuities received by employees from patrons and reported to employers are included. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for social security, income tax, insurance, union dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service for form 941.

Payroll first quarter—This item consists of payroll, as defined above, paid to persons employed at any time during the quarter January to March 1977.

Paid employees for week including March 12—Paid employees consist of the full-time and part-time employees, including

salaried officers and executives of corporations, who were on the payroll in the pay period including March 12, 1977. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses. The definition of paid employees is the same as that used on IRS form 941.

Central administrative offices and auxiliaries—Each company included in this census was asked to identify and report separately as "central administrative offices" or "auxiliaries" those locations whose primary functions were to manage, administer, service, or support the activities of the other establishments of the company. Data for such central administrative offices and auxiliaries which primarily service retail establishments will be presented in a subsequent report issued as part of the 1977 Enterprise Statistics series of reports.

KIND-OF-BUSINESS CLASSIFICATIONS

Retail trade, major groups 52 through 59 in the 1972 SIC manual, includes establishments engaged in selling merchandise for personal or household consumption and in rendering services incidental to the sale of the goods. Exceptions are necessitated by trade practices. For example, lumber yards and paint, glass, and wallpaper stores are included in retail trade if they sell to the general public, even if a higher proportion of their sales is made to contractors. Establishments engaged in selling products to the general public from displayed merchandise, such as typewriters, stationery, or gasoline, are classified in retail trade even though such products may not be used for personal or household consumption. However, establishments that sell exclusively to business establishments, institutional and industrial users, or contractors are classified in wholesale trade.

Other important characteristics of retail trade establishments are that they are usually fixed places of business; they are engaged in activities to attract the general public to buy; they buy or receive as well as sell merchandise; they may process their products, although processing is incidental or subordinate to selling; and they are considered as retail in the trade. Not all of these characteristics need be present and some are modified by trade practice.

Establishments covered by the census were assigned kind-of-business classifications in accordance with the industry classifications defined in the 1972 SIC manual. When a more detailed classification was needed than that defined in the SIC manual, more kinds of business were identified within an SIC. In general, retail establishments were classified according to the principal lines of commodities sold (groceries, hardware, etc.), or the usual trade designation (drug store, cigar store, etc.).

Kind-of-business classifications are not interchangeable with commodity classifications; most businesses sell several kinds of commodities. The kind-of-business code generally reflects either the individual commodity or the commodity group which is the primary source of the establishment's receipts, or some mixture of commodities which characterizes the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity

or the sales of that commodity. For example, the "food stores" classification excludes stores selling food if the sale of food is not the primary source of receipts; moreover, even though stores are classified as "food stores" some of their receipts may be derived from the sale of nonfood products. (Some indication of the extent to which various broad groups of commodities, or "merchandise lines," are characteristic of different kinds of business is given in the 1977 Census of Retail Trade report, Merchandise Line Sales.)

Building Materials, Hardware, Garden Supply, and Mobile Home Dealers (SIC Major Group 52)

This major group includes retail establishments primarily engaged in selling lumber and other building materials; paint, glass, and wallpaper; hardware; nursery stock; lawn and garden supplies; and mobile homes. It includes lumber and other building materials dealers and paint, glass, and wallpaper stores selling to the general public, even if sales to contractors account for a larger proportion of total sales; these establishments are known as "retail" in the trade. Establishments primarily selling these products but not selling to the general public are classified in wholesale trade.

Lumber and other building materials dealers (SIC 521)—Establishments engaged in selling primarily lumber or lumber and a general line of building materials to the general public. While these establishments may also sell to contractors, they are known as "retail" in the trade. The lumber they sell may include rough and dressed lumber, flooring, molding, doors, sashes, frames, and other millwork. The building materials may include roofing, siding, shingles, wallboard, paint, brick, tile, cement, sand, gravel, and other building materials and supplies. Hardware is often an important line of retail lumber and building materials dealers. Establishments not selling to the general public or known in the trade as "wholesale" are classified in SIC 503.

Paint, glass, and wallpaper stores (SIC 523)—Establishments engaged in selling primarily paint, glass, and wallpaper, or any combination of these lines, to the general public. While these establishments may also sell to contractors, they are known as "retail" in the trade. Establishments not selling to the general public or that are known in the trade as "wholesale" are classified in wholesale trade.

Hardware stores (SIC 525)—Establishments primarily selling a number of basic hardware lines such as tools, builders' hardware, paint and glass, housewares and household appliances, cutlery, and roofing materials, no one of which accounts for 50 percent or more of the sales of the establishments.

Retail nurseries, lawn and garden supply stores (SIC 526)—Establishments primarily engaged in selling trees, shrubs, other plants, seeds, bulbs, mulches, soil conditioners, fertilizers, pesticides, garden tools, and other garden supplies to the general public. These establishments primarily sell products purchased

from others, but may sell some plants which they grow themselves. Establishments primarily engaged in the growing of plants are classified in SIC major group 01.

Mobile home dealers (SIC 527)—Establishments primarily engaged in the retail sales of new and used mobile homes, including parts and accessories. Establishments primarily selling travel trailers and campers are classified in SIC 5561.

General Merchandise Group Stores (SIC Major Group 53)

This major group includes retail stores which sell a number of lines of merchandise, such as dry goods, apparel and accessories, furniture and home furnishings, small wares, hardware, and food. The stores included in this group are known as department stores, variety stores, general merchandise stores, general stores, etc. Establishments primarily engaged in selling used general merchandise are classified in SIC 593, and those selling general merchandise by mail, vending machine, or direct selling are classified in SIC 596.

Department stores (SIC 531)—Establishments normally employing 25 people or more, having sales of apparel and softgoods combined amounting to 20 percent or more of total sales, and selling each of the following lines of merchandise:

To qualify as a department store, sales of each of the lines listed above must be less than 80 percent of total sales. An establishment with total sales of \$10 million or more is classified as a department store even if sales of one of the merchandise lines listed above exceed the maximum percent of total sales, provided that the combined sales of the other two groups are \$1 million or more. Relatively few stores are included in this classification as a result of this special rule and most of those which are would otherwise have been classified in the apparel group (SIC major group 56).

Since many automatic merchandising machine operations are conducted in conjunction with the operation of manufacturing plants and of other establishments not classified in retail trade, data for "retail" automatic merchandising machine operators should not be interpreted as a measure of total sales through automatic merchandising machines. Direct selling establishments (SIC 5963)—Establishments primarily selling merchandise by house-to-house canvass, by party plan, by telephone, or from a truck.
